

<b>Document Title</b>	Specification of Platform Types
<b>Document Owner</b>	AUTOSAR
<b>Document Responsibility</b>	AUTOSAR
<b>Document Identification No</b>	048
<b>Document Classification</b>	Standard

<b>Document Version</b>	2.5.0
<b>Document Status</b>	Final
Part of Release	4.0
Revision	3

	Document Change History			
Date	Date Version Changed by Change Description			
14.11.2011	2.5.0	AUTOSAR Administration	<ul> <li>Clarified use of operators for boolean variables</li> <li>Implemented new traceability mechanism</li> </ul>	
26.10.2010	2.4.0	AUTOSAR Administration	<ul> <li>Detailed published parameter names (module names) in chapter 10. The previous definition was ambiguous across several releases</li> <li>Changed "Module Short Name" (MSN) to "Module Abbreviation" (MAB) for the use of API service prefixes such as "CanIf"</li> </ul>	
04.12.2009	2.3.0	AUTOSAR Administration	<ul> <li>Restored PLATFORM012</li> <li>Clarified endian support</li> <li>Clarified support for variable register width architectures</li> <li>Legal disclaimer revised</li> </ul>	
23.06.2008	2.2.1	AUTOSAR Administration	Legal disclaimer revised	
13.11.2007	2.2.0	AUTOSAR Administration	<ul> <li>Chapter 8.2: "AUTOSAR supports for compiler and target implementation only 2 complement arithmetic"</li> <li>Chapter 12.10: changed the basic type for *_least types (optimized types) from 'int' to 'long' for SHx processors</li> <li>Removal the explicit cast to boolean in the precompile definition (#define) for macros TRUE and FALSE ("#define TRUE ((boolean) 1)" has become "#define TRUE 1")</li> <li>Document meta information extended</li> <li>Small layout adaptations made</li> </ul>

#### **Disclaimer**

This specification and the material contained in it, as released by AUTOSAR is for the purpose of information only. AUTOSAR and the companies that have contributed to it shall not be liable for any use of the specification.

The material contained in this specification is protected by copyright and other types of Intellectual Property Rights. The commercial exploitation of the material contained in this specification requires a license to such Intellectual Property Rights.

This specification may be utilized or reproduced without any modification, in any form or by any means, for informational purposes only.

For any other purpose, no part of the specification may be utilized or reproduced, in any form or by any means, without permission in writing from the publisher.

The AUTOSAR specifications have been developed for automotive applications only. They have neither been developed, nor tested for non-automotive applications.

The word AUTOSAR and the AUTOSAR logo are registered trademarks.

#### Advice for users

AUTOSAR Specification Documents may contain exemplary items (exemplary reference models, "use cases", and/or references to exemplary technical solutions, devices, processes or software).

Any such exemplary items are contained in the Specification Documents for illustration purposes only, and they themselves are not part of the AUTOSAR Standard. Neither their presence in such Specification Documents, nor any later documentation of AUTOSAR conformance of products actually implementing such exemplary items, imply that intellectual property rights covering such exemplary items are licensed under the same rules as applicable to the AUTOSAR Standard.

### 1 Introduction and functional overview

This document specifies the AUTOSAR platform types header file. It contains all platform dependent types and symbols. Those types must be abstracted in order to become platform and compiler independent.

It is required that all platform types files are unique within the AUTOSAR community to guarantee unique types per platform and to avoid type changes when moving a software module from platform A to B.

# 2 Acronyms and abbreviations

Acronyms and abbreviations that have a local scope are not contained in the AUTOSAR glossary. These must appear in a local glossary.

Acronym:	Description:
Rollover mechanism	The following example sequence is called 'rollover':  • An unsigned char has the value of 255  • It is incremented by 1  • The result is 0
SDU	Service Data Unit (payload)

Abbreviation:	Description:
int	Integer

# 4 Constraints and assumptions

#### 4.1 Limitations

No limitations.

## 4.2 Applicability to car domains

No restrictions.

### 4.3 Applicability to safety related environments

The AUTOSAR boolean type may be used if the correct usage (see <u>PLATFORM027</u>) is proven by a formal code review or a static analysis by a validated static analysis tool.

The optimized AUTOSAR integer data types (\*\_least) may be used if the correct usage (see <u>PLATFORM005</u>) is proven by a formal code review or a static analysis by a validated static analysis tool.

# 5 Dependencies to other modules

None.

### 5.1 File structure

#### 5.1.1 Code file structure

None

#### 5.1.2 Header file structure

Two header file structures are applicable. One is depending on communication related basic software modules and the second is depending on non-communication related basic software modules.

#### 5.1.2.1 Communication related basic software modules

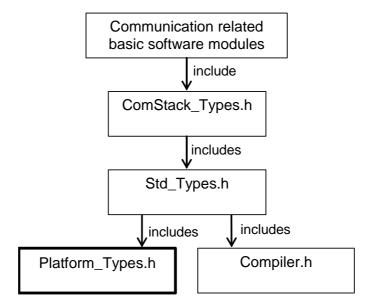

Figure 1: Include File Structure for communication related basic software modules

- If existing, <mab>\_Types.h shall include ComStack\_Types.h where <mab> (module abbreviation) is a communication related basic software module (e.g. Com, PduR, Can...).
- ComStack\_Types.h shall include Std\_Types.h
- Std\_Types.h shall include Platform\_Types.h
- Std\_Types.h shall include Compiler.h

The existence and purpose of <mab>\_Types.h is specified in the module specific SWS document.

#### 5.1.3 Non-communication related basic software modules

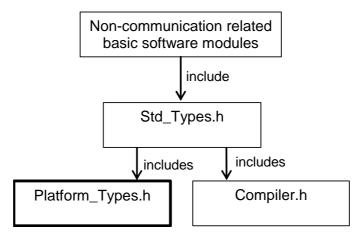

Figure 2: Include File Structure for non-communication related basic software modules

- <mab>\_Types.h shall include Std\_Types.h where <mab> (module abbreviation) is a non-communication related basic software module (e.g. Mcu, WdgM ...)
- Std\_Types.h shall include Platform\_Types.h
- Std\_Types.h shall include Compiler.h

## 7 Functional specification

#### 7.1 General issues

[PLATFORM001] [For each platform an own platform types header file has to be provided. ] (BSW00353, BSW00304)

Here, the term "platform" refers to both the microcontroller type and, if applicable, the specific mode of the microcontroller with regard to instruction set, register size etc. For example, for a microcontroller that can run both 16-bit and 32-bit code (e.g. a x86 based CPU), two different platform types header files for each of these two instruction sets shall be created.

**[PLATFORM031]** [If a specific compiler (not listed in this specification) requires a different mapping of ANSI C types to the AUTOSAR standard integer types, an own platform types header file for this compiler has to be provided. ] ()

[PLATFORM003] [The file name of the platform types header file shall be for all platforms 'Platform\_Types.h'.] (BSW00353, BSW00304)

**[PLATFORM002]** [It is not allowed to add any extension to this file. Any extension invalidates the AUTOSAR conformity. | ( )

## 7.2 CPU Type

[PLATFORM044] [For each platform the register width of the CPU used shall be indicated by defining CPU\_TYPE. ] ()

[PLATFORM045] [According to the register width of the CPU used, CPU\_TYPE shall be assigned to one of the symbols CPU\_TYPE\_8, CPU\_TYPE\_16 or CPU\_TYPE\_32.]
()

#### 7.3 Endianess

The pattern for bit, byte and word ordering in native types, such as integers, is called endianess.

[PLATFORM043] [For each platform the appropriate bit order on register level shall be indicated in the platform types header file using the symbol CPU\_BIT\_ORDER. ] ()

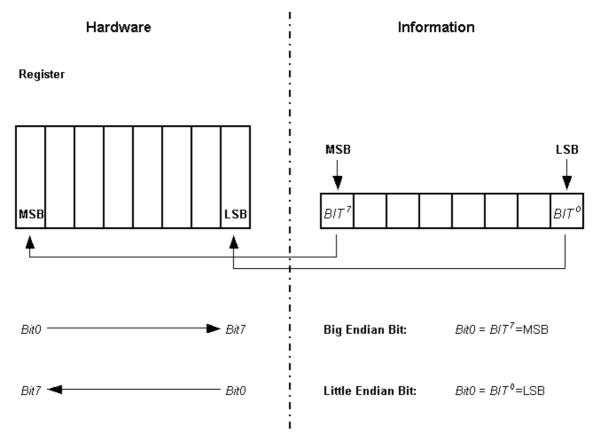

**[PLATFORM046]** [For each platform the appropriate byte order on memory level shall be indicated in the platform types header file using the symbol CPU\_BYTE\_ORDER.]()

### 7.3.1 Bit Ordering (Register)

[PLATFORM048] [In case of big endian bit ordering CPU\_BIT\_ORDER shall be assigned to MSB\_FIRST in the platform types header file. | ()

[PLATFORM049] [In case of little endian bit ordering CPU\_BIT\_ORDER shall be assigned to LSB FIRST in the platform types header file. | ( )

#### Illustrations:

#### **Important Note:**

The naming convention Bit0, Bit1, etc. and the bit's significance within a byte, word, etc. are different topics and shall not be mixed. The counting scheme of bits in Motorola  $\mu$ C-architecture's (Big Endian Bit Order) starts with Bit0 indicating the Most Significant Bit, whereas all other  $\mu$ C using Little Endian Bit Order assign Bit0 to be the Least Significant Bit!

The MSB in an accumulator is always stored as the left-most bit regardless of the CPU type. Hence, big and little endianess bit orders imply different bit-naming conventions.

### 7.3.2 Byte Ordering (Memory)

[PLATFORM050] [In case of big endian byte ordering CPU\_BYTE\_ORDER shall be assigned to HIGH\_BYTE\_FIRST in the platform types header file. | ( )

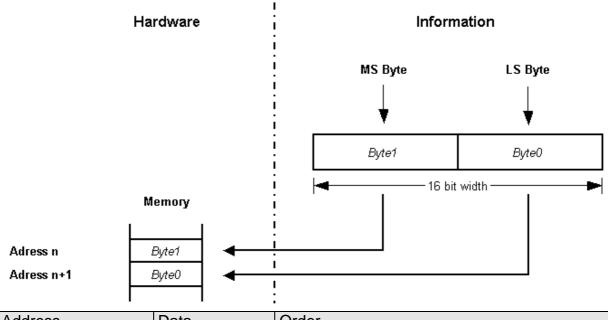

[PLATFORM051] [In case of little endian byte ordering CPU\_BYTE\_ORDER shall be assigned to LOW\_BYTE\_FIRST in the platform types header file. ] ()

Naming convention for illustration:

The Most Significant Byte within a 16 bit wide data is named Byte1. The Least Significant Byte within a 16 bit wide data is named Byte0.

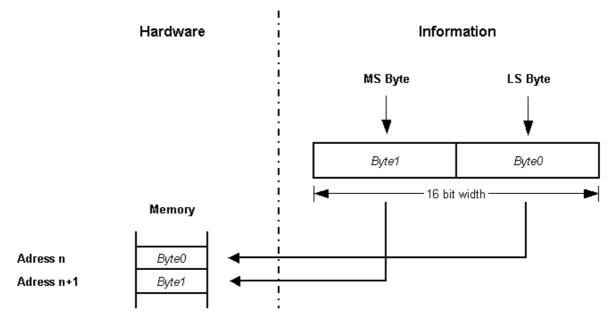

#### Big Endian(HIGH\_BYTE\_FIRST)

Address	Data	Order
n	Byte1	Most Significant Byte (HIGH_BYTE_FIRST)
n+1	Byte0	Least Significant Byte

#### Little Endian (LOW\_BYTE\_FIRST)

Address	Data	Order
n	Byte0	Least Significant Byte (LOW_BYTE_FIRST)
n+1	Byte1	Most Significant Byte

#### **Important Note:**

The naming convention Byte0 and Byte1 is not unique and may be different in the manufacturer's reference documentation for a particular  $\mu$ C.

### 7.4 Optimized integer data types

[PLATFORM005] [The optimized AUTOSAR integer data types (<typename>\_least) shall have at least the size given by the type name, but the types shall be implemented in a way that the best performance on the specific platform is achieved. 'Best performance' is defined in this context as 'least processor cycles for variable access as possible'. Example: on a TC1796, uint8\_least is mapped to unsigned int (32 bit) because access to this type requires less processor cycles than e.g. unsigned char (8 bit). | (BSW00304)

[PLATFORM032] [The optimized AUTOSAR integer data types (<typename>\_least) shall only be used with a local scope inside a module. They are not allowed to be used within the API of a module. ] ()

**[PLATFORM033]** [Operations on the optimized AUTOSAR integer data types (\*\_least) shall not expect a specific size of this type. The size specified by the name is guaranteed, but can be larger. It is not allowed to use rollover mechanisms during counting and shifting.]()

Examples of usage:

- Loop counters (e.g. maximum loop count = 124 → use uint8\_least)
- Switch case arguments (e.g. maximum number of states = 17 → use uint8\_least)

### 7.5 boolean data type

[PLATFORM027] [The standard AUTOSAR type boolean shall be implemented as an unsigned integer with a bit length that is the shortest one natively supported by the platform (in general 8 bits). | (BSW00378)

**[PLATFORM034]** [The standard AUTOSAR type boolean shall only be used in conjunction with the standard symbols TRUE and FALSE. For value assignments of variables of type boolean no arithmetic or logical operators (+, ++, -, --, \*, /, %, <<, >>, ~, &) must be used. The only allowed form of assignment is

### The only allowed forms of comparison are

```
boolean var = FALSE;
...
if (var == TRUE) ...
if (var == FALSE) ...
if (var != TRUE) ...
if (var != FALSE) ...
if (var) ...
if (!var) ...
] (BSW00378)
```

# 8 API specification

### 8.1 Imported types

Not applicable.

# 8.2 Type definitions

Type definitions. [PLATFORM061] [Concerning the signed integer types, AUTOSAR supports for compiler and target implementation only 2 complement arithmetic. This directly impacts the chosen ranges for these types. ] ()

#### 8.2.1 boolean

Туре:	Unsigned integer
Range:	0 FALSE
	1 TRUE
Description:	[PLATFORM026] [This standard AUTOSAR type shall only be used together with the definitions TRUE and FALSE. See PLATFORM027 for implementation and usage. ] (BSW00378)  [PLATFORM060] [The boolean type shall always be mapped to a platform specific type where pointers can be applied to in order to enable a passing of parameters via API.  There are specific BIT types of some HW platforms which are very efficient but
	where no pointers can point to. ] ()

## 8.2.2 uint8

Type:	Unsigned integer
Range:	0255 8 bit 0x000xFF
Description:	[PLATFORM013] [This standard AUTOSAR type shall be of 8 bit unsigned. ] (BSW00304)

#### 8.2.3 uint16

Туре:	Unsigned integer
Range:	065535 16 bit 0x00000xFFFF
Description:	<b>[PLATFORM014]</b> [This standard AUTOSAR type shall be of 16 bit unsigned. ] (BSW00304)

#### 8.2.4 uint32

Type:	Unsigned integer
Range:	04294967295 32 bit 0x000000000xFFFFFFF
Description:	<b>[PLATFORM015]</b> [This standard AUTOSAR type shall be 32 bit unsigned. ] (BSW00304)

#### 8.2.5 sint8

Type:	Signed integer
Range:	-128+127 7 bit + 1 bit sign 0x800x7F
Description:	<b>[PLATFORM016]</b> [This standard AUTOSAR type shall be 8 bit signed. ] (BSW00304)

### 8.2.6 sint16

Type:	Signed integer									
Range:	-32768+32767 0x80000x7FFF	,	15 bit + 1 bi	t sign						
Description:	[PLATFORM017] [This (BSW00304)	standard /	AUTOSAR	type	shall	be	16	bit	signed.	J

### 8.2.7 sint32

Туре:	Signed integer
Range:	-2147483648 +2147483647 31 bit + 1 bit sign 0x800000000x7FFFFFFF
Description:	[PLATFORM018] [ ] (BSW00304)

#### 8.2.8 uint8\_least

Type:	Unsigned integer
Range:	At least 0255 At least 8 bit
Description:	[PLATFORM020] [This optimized AUTOSAR type shall be at least of 8 bit
	unsigned. See PLATFORM005 for implementation and usage.   (BSW00304)

### 8.2.9 uint16\_least

Type:	Unsigned integer
Range:	At least 065535 At least 16 bit
Description:	[PLATFORM021] [This standard AUTOSAR type shall be at least 16 bit
	unsigned. See PLATFORM005 for implementation and usage. (BSW00304)

### 8.2.10 uint32\_least

Type:	Unsigned integer						
Range:	At least 04294967295	At least 32 bit					
Description:	[PLATFORM022]. See (BSW00304)	PLATFORM005	for	implementation	and	usage.	J

### 8.2.11 sint8\_least

Type:	Signed integer				
Range:	At least -128+127 At least 7 bit + 1 bit sign				
Description:	<b>[PLATFORM023]</b> . See <u>PLATFORM005</u> for implementation and usage. J (BSW00304)				

#### 8.2.12 sint16\_least

Туре:	Signed integer
Range:	At least -32768+32767 At least 15 bit + 1 bit sign
Description:	[PLATFORM024]. See PLATFORM005 for implementation and usage. ] (BSW00304)

### 8.2.13 sint32\_least

Type:	Signed integer
Range:	At least -2147483648 At least 31 bit + 1 bit sign +2147483647
Description:	<b>[PLATFORM025]</b> See <u>PLATFORM005</u> for implementation and usage. J (BSW00304)

#### 8.2.14 float32

Туре:	Float
Range:	- 32 bit
Description:	[PLATFORM041]

#### 8.2.15 float64

Type:	Double
Range:	- 64 bit
Description:	[PLATFORM042] [ ] ( )

# 8.3 Symbol definitions

## 8.3.1 CPU\_TYPE

Symbol	CPU_TYPE			
Range	CPU_TYPE_8	Indicating a 8 bit processor		
	CPU_TYPE_16	Indicating a 16 bit processor		
	CPU_TYPE_32	Indicating a 32 bit processor		
Description:	This symbol shall be defined as #define having one of the values CPU_TYPE_8, CPU_TYPE_16 or CPU_TYPE_32 according to the platform.			

#### 8.3.2 CPU\_BIT\_ORDER

Symbol	CPU_BIT_ORDER											
Range	MSB_FIRST	The	most	significant	bit	is	the	first	bit	of	the	bit
		sequ	ence.									
	LSB_FIRST	The	least	significant	bit	is	the	first	bit	of	the	bit
		sequ	ence.									
Description:	[PLATFORM038] [MSB_FIRST_LSB_FIRST_] ()											

#### 8.3.3 CPU\_BYTE\_ORDER

Symbol	CPU_BYTE_ORDER				
Range	HIGH_BYTE_FIRST	Within a uint16, the high byte is located before the low byte.			
	LOW_BYTE_FIRST	Within uint16, the low byte is located before the high byte.			
Description:	PLATFORM039] [This symbol shall be defined as #define having one of the				
	values HIGH_BYTE_FIRST or LOW_BYTE_FIRST according to the platform. ] ()				

### 8.3.4 TRUE, FALSE

Symbol/Value:	TRUE	1
Symbol/Value:	FALSE	0
Description:		
	[PLATFORM054] [In c	ase of in-built compiler support of the symbols,
	redefinitions shall be avoid	ded using a conditional check. ] ()
	[PLATFORM056] [The sy	mbols TRUE and FALSE shall be defined as follows:
	<pre>#ifndef TRUE   #define TRUE    1 #endif</pre>	
	<pre>#ifndef FALSE   #define FALSE  0 #endif] ( )</pre>	

**[PLATFORM055]** [These symbols shall only be used in conjunction with the boolean type defined in Platform\_Types.h. ] ()

### 8.4 Function definitions

Not applicable.

### 8.5 Call-back notifications

Not applicable.

### 8.6 Scheduled functions

Not applicable.

# 8.7 Expected Interfaces

Not applicable.

# 9 Sequence diagrams

Not applicable.

## 10 Configuration specification

### 10.1 Published parameters

**[PLATFORM062]** [The standardized common published parameters as required by BSW00402 in the General Requirements on Basic Software Modules [1] shall be published within the header file of this module and need to be provided in the BSW Module Description. The according module abbreviation can be found in the List of Basic Software Modules [3]. | (BSW00402, BSW004, BSW003, BSW00318)

The standard common published information like

```
vendorld (PLATFORM_VENDOR_ID),
moduleld (PLATFORM_MODULE_ID),
arMajorVersion (PLATFORM_AR_MAJOR_VERSION),
arMinorVersion (PLATFORM_AR_MINOR_VERSION),
arPatchVersion (PLATFORM_AR_PATCH_VERSION),
swMajorVersion (PLATFORM_SW_MAJOR_VERSION),
swMinorVersion (PLATFORM_SW_MINOR_VERSION),
swPatchVersion (PLATFORM_SW_PATCH_VERSION),
vendorApiInfix (PLATFORM_VENDOR_API_INFIX)
```

is provided in the BSW Module Description Template (see [2] Figure 4.1 and Figure 7.1).

Additional published parameters are listed below if applicable for this module.

### 11 Annex

### 11.1 Type definitions – general

**[PLATFORM057]** The platform type files for all platforms shall contain the following symbols:

```
#define CPU_TYPE_8 8
#define CPU_TYPE_16 16
#define CPU_TYPE_32 32

#define MSB_FIRST 0
#define LSB_FIRST 1

#define HIGH_BYTE_FIRST 0
#define LOW_BYTE_FIRST 1

J()
```

### 11.2 Type definitions - S12X

**[PLATFORM006]** [The platform types for Freescale S12X shall have the following mapping to the ANSI C types:

#### Symbols:

```
#define CPU TYPE
                        CPU TYPE 16
#define CPU_BIT_ORDER
                       LSB_FIRST
#define CPU_BYTE_ORDER
                        HIGH_BYTE_FIRST
Types:
typedef unsigned char
                        boolean;
typedef signed char
                        sint8;
typedef unsigned char
                        uint8;
typedef signed short
                       sint16;
typedef unsigned short
                       uint16;
typedef signed long
                        sint32;
typedef unsigned long
                        uint32;
typedef signed char sint8_least;
typedef unsigned char
                       uint8_least;
typedef signed short
                        sint16 least;
typedef unsigned short uint16_least;
typedef float
                        float32;
typedef double
                        float64;
( )
```

### 11.3 Type definitions – ST10

**[PLATFORM007]** [The platform types for ST Microelectronics ST10 shall have the following mapping to the ANSI C types:

```
Symbols:
#define CPU TYPE
                          CPU TYPE 16
#define CPU_BIT_ORDER
                         LSB FIRST
#define CPU_BYTE_ORDER
                          LOW_BYTE_FIRST
Types:
typedef unsigned char
                          boolean;
typedef signed char
                          sint8;
typedef unsigned char
                          uint8;
typedef signed short
                         sint16;
typedef unsigned short uint16;
typedef signed long
                         sint32;
typedef unsigned long
                         uint32;
typedef unsigned short
                         uint8 least;
typedef unsigned short uint16_least;
typedef unsigned long uint32_least;
typedef signed short typedef signed short
                         sint8_least;
float32;
typedef float
typedef double
                          float64;
] ( )
```

### 11.4 Type definitions - ST30

**[PLATFORM008]** [The platform types for STMicroelectronics ST30 shall have the following mapping to the ANSI C types:

#### Symbols:

```
#define CPU_TYPE
                          CPU_TYPE_32
#define CPU_BIT_ORDER
                          LSB_FIRST
#define CPU_BYTE_ORDER
                          LOW_BYTE_FIRST
Types:
typedef unsigned char
                          boolean;
typedef signed char
                          sint8;
typedef unsigned char
                          uint8;
typedef signed short
                         sint16;
typedef unsigned short
                         uint16;
typedef signed long
                           sint32;
```

```
typedef unsigned long
    uint32;

typedef unsigned long
    uint8_least;
typedef unsigned long
    uint16_least;
typedef unsigned long
    uint32_least;
typedef signed long
    sint8_least;
typedef signed long
    sint16_least;
typedef signed long
    sint32_least;

typedef float
    float32;
typedef double
    float64;
```

### 11.5 Type definitions – V850

**[PLATFORM009]** [The platform types for NEC V850 shall have the following mapping to the ANSI C types:

#### Symbols:

```
#define CPU TYPE
                            CPU TYPE 32
                           LSB_FIRST
#define CPU_BIT_ORDER
#define CPU_BYTE_ORDER
                            LOW_BYTE_FIRST
Types:
typedef unsigned char
                            boolean;
typedef signed char
                            sint8;
typedef unsigned char
                            uint8;
typedef signed short
                           sint16;
typedef unsigned short uint16;
typedef signed long
                            sint32;
typedef unsigned long
                            uint32;
                         uint8_least;
uint16_least;
uint32_least;
typedef unsigned long
typedef unsigned long
typedef unsigned long
typedef signed long typedef signed long
                           sint8 least;
                           sint16_least;
typedef signed long
                            sint32 least;
typedef float
                            float32;
typedef double
                            float64;
1()
```

## 11.6 Type definitions - MPC5554

**[PLATFORM010]** [The platform types for Freescale MPC5554 shall have the following mapping to the ANSI C types:

```
Symbols:
#define CPU_TYPE
                            CPU_TYPE_32
#define CPU_BIT_ORDER
                            MSB_FIRST
#define CPU_BYTE_ORDER
                            HIGH_BYTE_FIRST
Types:
typedef unsigned char
                            boolean;
typedef signed char
                            sint8;
typedef unsigned char
                            uint8;
typedef signed short
                            sint16;
typedef unsigned short
                          uint16;
typedef signed long
                            sint32;
typedef unsigned long
                            uint32;
typedef unsigned long
                            uint8_least;
typedef unsigned long
                            uint16_least;
typedef unsigned long typedef signed long
                            uint32 least;
                            sint8_least;
typedef signed long
                            sint16 least;
typedef signed long
                            sint32_least;
typedef float
                            float32;
typedef double
                            float64;
1()
```

## 11.7 Type definitions – TC1796/TC1766

**[PLATFORM011]** [The platform types for Infineon TC1796/TC1766 shall have the following mapping to the ANSI C types:

#### Symbols:

#define	CPU_TYPE CPU_BIT_ORDER CPU_BYTE_ORDER	CPU_TYPE_32 LSB_FIRST LOW_BYTE_FIRST
Types: typedef	unsigned char	boolean;
typedef	signed char	sint8;
typedef	unsigned char	uint8;
typedef	signed short	sint16;
typedef	unsigned short	uint16;
typedef	signed long	sint32;
typedef	unsigned long	uint32;
typedef typedef	unsigned long unsigned long unsigned long signed long	<pre>uint8_least; uint16_least; uint32_least; sint8_least;</pre>

### 11.8 Type definitions - MB91F

**[PLATFORM019]** [The platform types for Fujitsu MB91F shall have the following mapping to the ANSI C types:

#### Symbols:

```
#define CPU_TYPE
                                 CPU_TYPE_32
#define CPU_BIT_ORDER
                                 LSB_FIRST
#define CPU_BYTE_ORDER HIGH_BYTE_FIRST
Types:
typedef unsigned char
                                 boolean;
typedef signed char
                                 sint8;
typedef unsigned char
                                uint8;
typedef signed short
                                sint16;
typedef unsigned short
                                uint16;
typedef signed long
                                sint32;
typedef unsigned long
                                 uint32;
typedef unsigned long
typedef unsigned long
typedef unsigned long
typedef unsigned long
uint16_least;
typedef unsigned long
uint32_least;
signed long
sint8_least;
sint16 least;
typedef signed long
                                sint16 least;
typedef signed long
                                 sint32_least;
typedef float
                                 float32;
typedef double
                                 float64;
1()
```

## 11.9 Type definitions - M16C/M32C

**[PLATFORM058]** [The platform types for Renesas M16C and M32C shall have the following mapping to the ANSI C types:

#### Symbols:

#### Types:

```
typedef unsigned char
                            boolean;
typedef signed char
                            sint8;
typedef unsigned char
                            uint8;
typedef signed short
                           sint16;
typedef unsigned short uint16;
typedef signed long
                            sint32;
typedef unsigned long
                            uint32;
typedef unsigned short
                            uint8_least;
typedef unsigned short typedef unsigned long
                            uint16_least;
                            uint32 least;
typedef signed short
                           sint8_least;
typedef signed short typedef signed long
                            sint16 least;
                           sint32 least;
typedef float
                            float32;
typedef double
                            float64;
1()
```

### 11.10Type definitions – SHx

**[PLATFORM059]** [The platform types for Renesas SHx shall have the following mapping to the ANSI C types:

#### Symbols:

37 of 38

```
#define CPU_TYPE
                          CPU_TYPE_32
#define CPU_BIT_ORDER
                         LSB_FIRST
#define CPU_BYTE_ORDER HIGH_BYTE_FIRST
Types:
typedef unsigned char
                          boolean;
                          sint8;
typedef signed char
typedef unsigned char
                         uint8;
typedef signed short
                         sint16;
typedef unsigned short
                          uint16;
typedef signed int
                          sint32;
typedef unsigned int
                          uint32;
typedef unsigned long
                          uint8_least;
typedef unsigned long
                          uint16_least;
typedef unsigned long uint32_least;
typedef signed long
                          sint8_least;
typedef signed long
                         sint16 least;
typedef signed long
                          sint32 least;
typedef float
                          float32;
typedef double
                          float64;
1 ( )
```

## 12 Not applicable requirements
